Please use our standard HTML template and replace all placeholder values with the information provided above. Follow these guidelines:

1. Create valid HTML following our established template structure
2. Convert subjects into clickable navigation tags with appropriate slugified URLs
3. Format the summary into appropriate paragraphs
4. Include all contributors in both the Core Details section and the Related Names list
5. Make sure to use the correct cover image path
6. Keep the "Related Books" section commented out for now
7. Ensure all metadata is properly displayed in the correct format

Example Command:
